Building an eCommerce System: Design, Development and Management

TRUONG Quoc Dinh, PhD

Introduction

- Turnkey solution
  - A pre-packaged e-business
- E-business templates
  - Outline the basic structure, but allow the design to be determined by the owner
- Project outsourcing
  - Available to businesses with substantial funding, alleviates the need for businesses to complete projects in-house
- Front-end system
  - Portion of an e-business that is visible to consumers
- Back-end system
  - Database management, payment processing and logistics

Getting Started

- Building, Managing and Maintaining
  - Advertising
  - Digital Marketing
  - Customer relationship management
  - Content management
  - Accepting online payments
  - Recognizing cultural differences and legal parameters
  - Providing security features

Generating Business Ideas

- Products and services
  - Discover what exists
  - Decide how to improve it
- Develop a business plan
  - Enables you to envision your e-business on paper for evaluation purposes
  - Serves as a presentation of your business' objectives and long-term expectations

Putting Your Plan Into Action

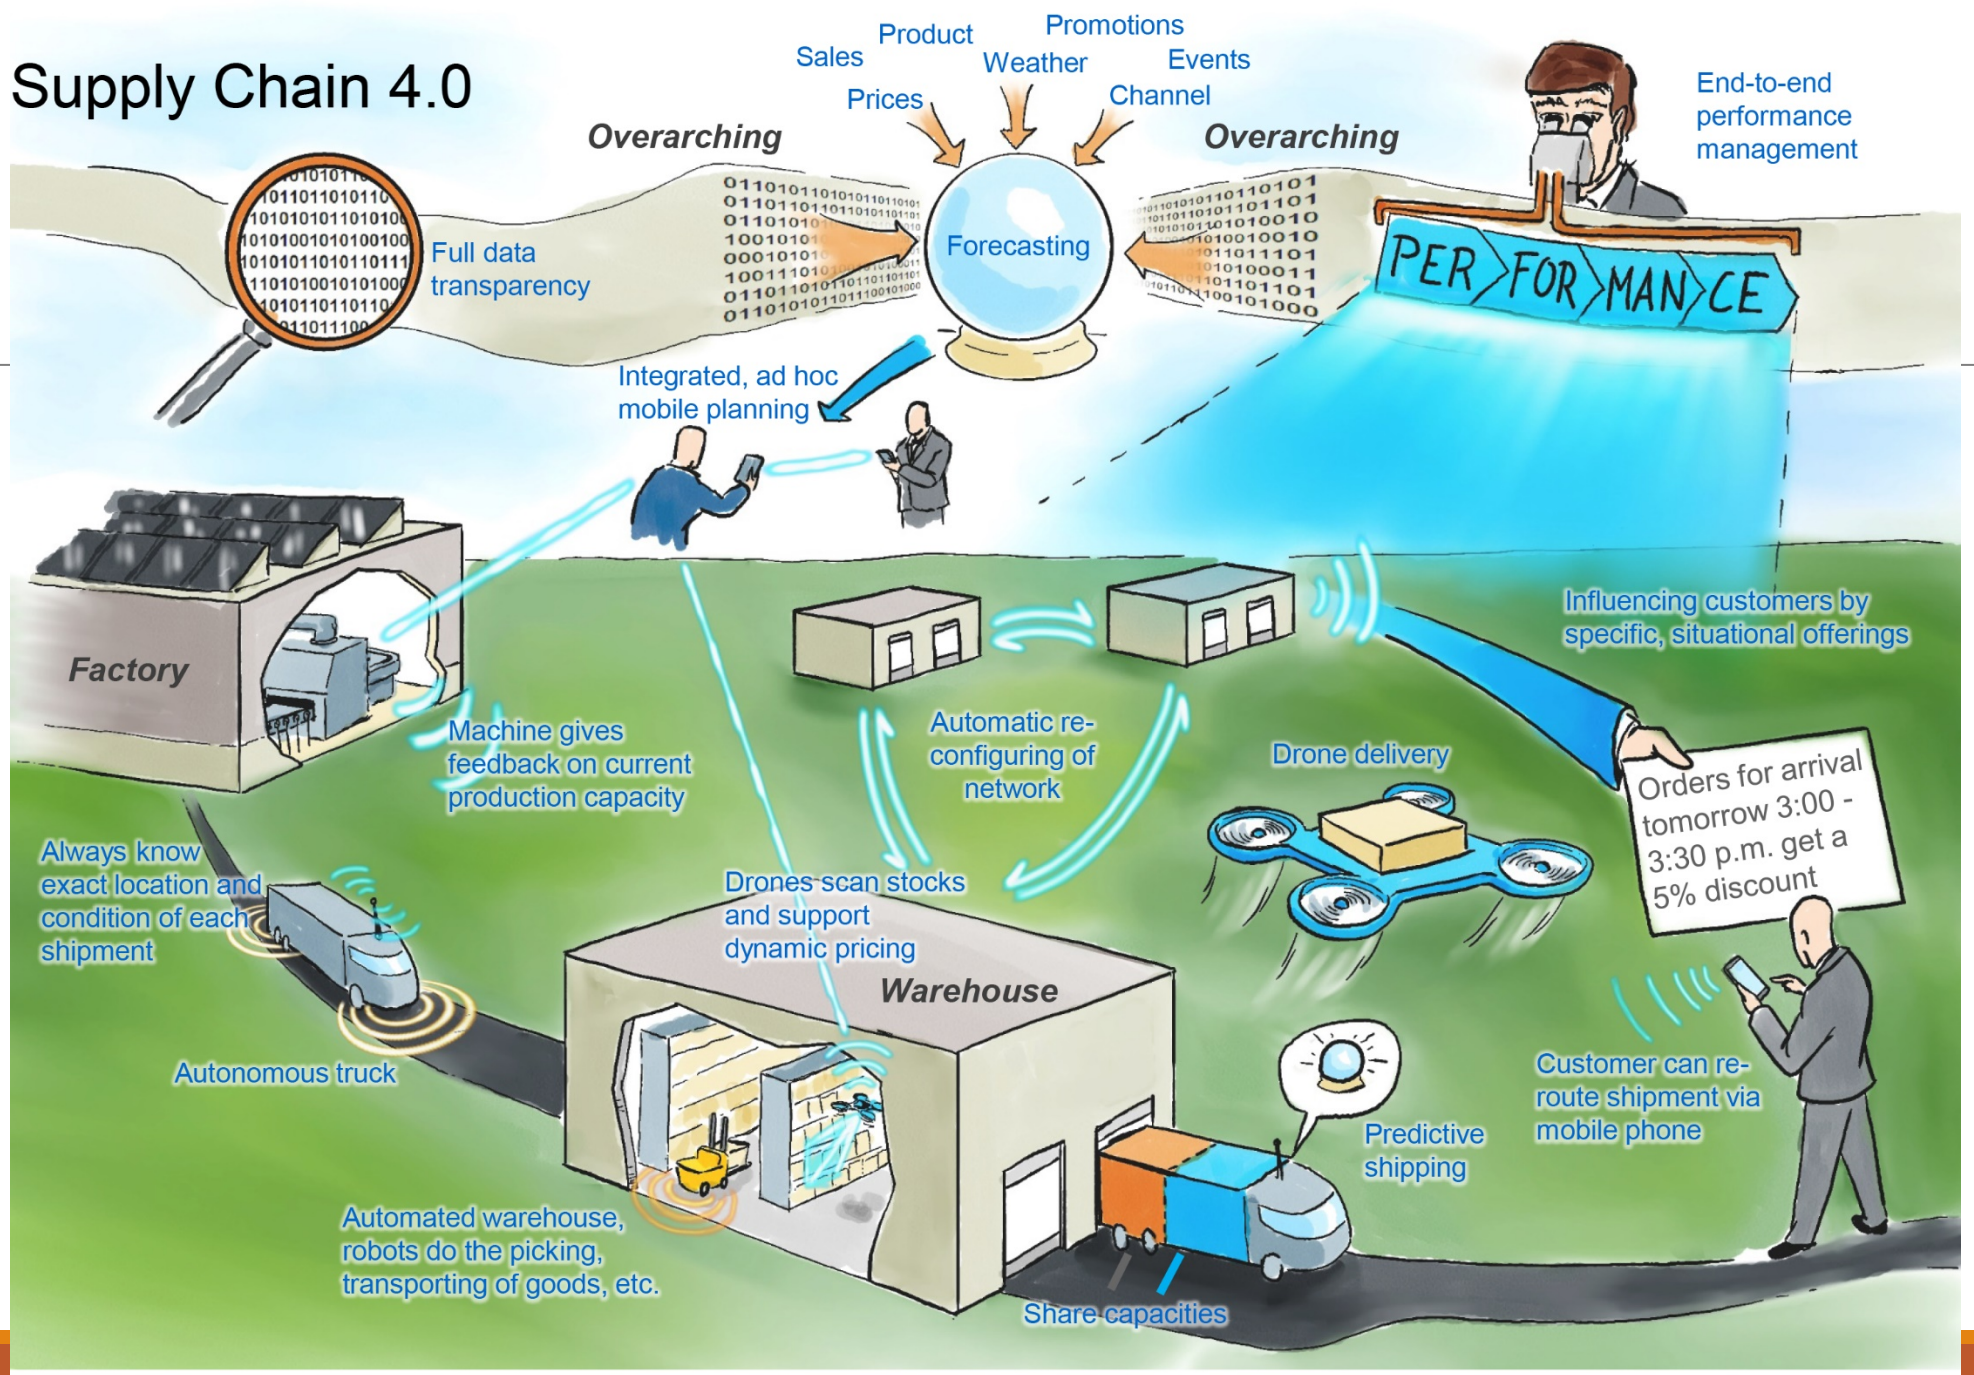

- *After generating ideas, building a business plan and finding funding, prepare to:*
  - Manage distribution
  - Manage shipping
  - Enhance the user experience through Web design
  - Prepare for new technologies
  - Purchase supporting hardware and software
  - Accept online payment
  - Market your Web site
  - Manage your consumers

Putting Your Plan Into Action - *Choosing a Domain Name*

- Domain name
  - The name used in the URL for a Website
  - Choose a concise name that people will be able to recognize and type easily
  - Consider how a domain name will be interpreted in many different languages and cultures
- Fully qualified host name
  - The host name, the domain name and the top-level domain (TLD)
  - Most Web servers use www as the host name
  - A domain name is often the name of the company that owns a site or a word or phrase that otherwise describes the site
  - The TLD usually describes the type of organization that owns the domain name (.com, .org, .gov)

Putting Your Plan Into Action - *Supply-Chain Management*

- Fulfillment
  - Warehouse storage, shipping, inventory management and return procedures
- Manufacturer
  - The direct producer of the product
- Distributor
  - The supplier who acts as a middleman to manufacturers and vendors, often reducing the price of an item by buying in bulk
- *Allows businesses with Web-enabled supply chains to accept made-to-order requests.*

SOURCE: McKinsey

Putting Your Plan Into Action - *Web Design*

- Web site should be easy to navigate
- Content should be the foundation of the site and updated regularly
- Design consistency
  - *Uniformity among the sections and pages*
- Easily located contact information
- Consistent appearance of logos and color scheme
- Easily located products and prices

Online Monetary Transactions

Credit-Card Transactions

- Popular form of payment for online purchases
- Resistance due to security concerns
- Many cards offer capabilities for online and offline purchases

Anatomy of an Online Credit-Card Transaction

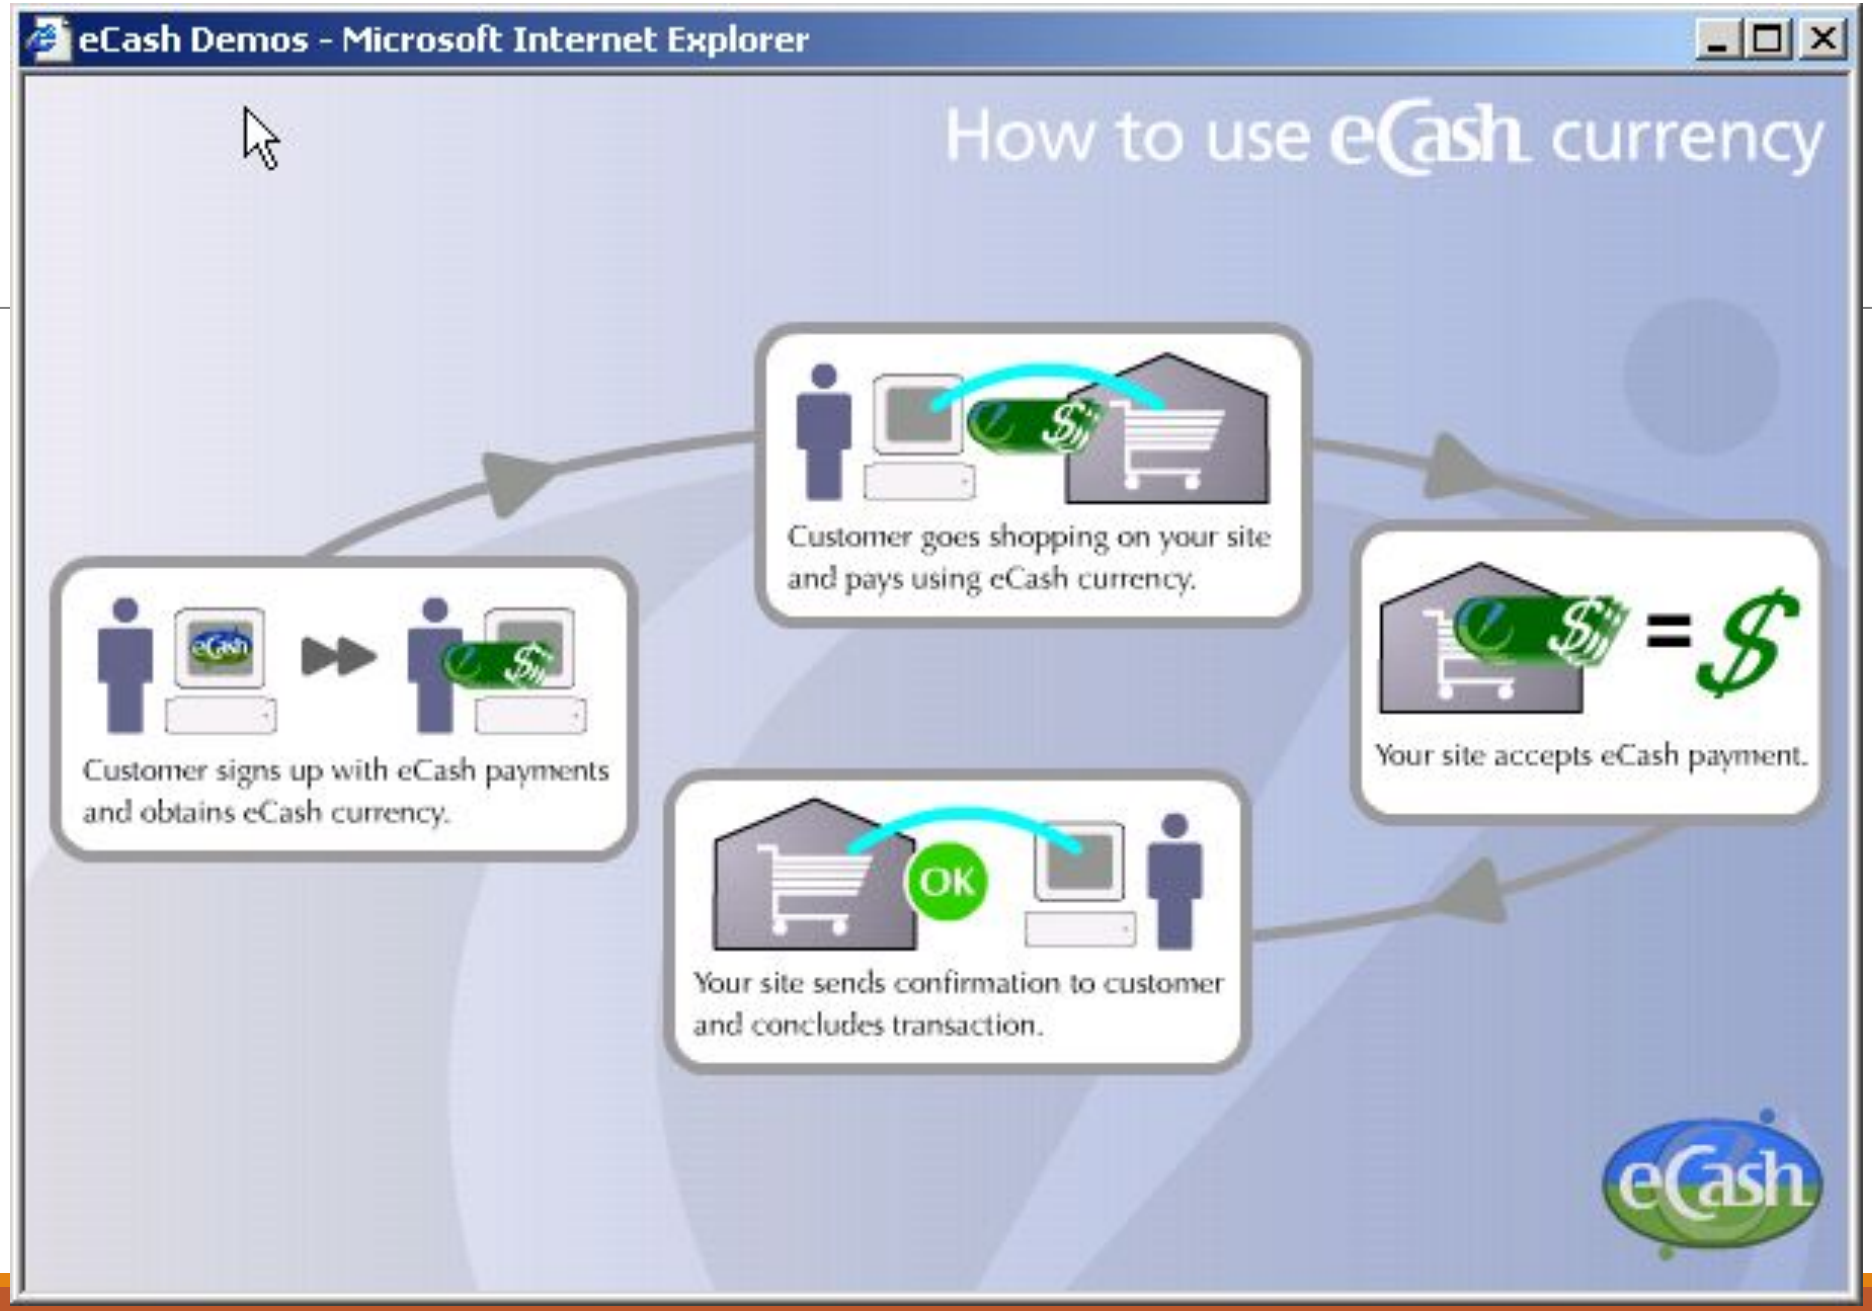

- To accept credit-card payments, a merchant must have a merchant account
- Traditional merchant accounts accept only POS (point-of-sale) transactions
  - Transactions that occur when you present your credit card at a store
- Card-not-present (CNP) transaction
  - Merchant does not see actual card being used in the purchase
- Authentication
  - The person is, in fact, who they say they are

Anatomy of an Online Credit-Card Transaction

- Authorization
  - The money is available to complete the transaction
- Acquiring bank
  - The bank with which the merchant holds an account
- Issuing bank
  - The bank from which the buyer obtained the credit card, and the credit-card association
- Verification
  - Money issued to merchant after product/service is distributed

Digital Currency

- Digital cash
  - Stored electronically, used to make online electronic payments
  - Similar to traditional bank accounts
  - Used with other payment technologies (digital wallets)
  - Alleviates some security fears online credit-card transactions
  - Allows those with no credit cards to shop online
  - Merchants accepting digital-cash payments avoid credit-card transaction fees
- *eCash Technologies, Inc*. is a secure digital-cash provider that allows you to withdraw funds from your traditional bank account

eCash Demos - Microsoft Internet Explorer
How to use eCash currency
Customer signs up with eCash payments and obtains eCash currency.
Customer goes shopping on your site and pays using eCash currency.
Your site accepts eCash payment.
OK
Your site sends confirmation to customer and concludes transaction.
eCash

E-Wallets

- E-wallets
  - Keep track of your billing and shipping information so that it can be entered with one click at participating sites
  - Store e-checks, e-cash and credit-card information
- Credit-card companies offer a variety of e-wallets
  - Visa e-wallets
  - MBNA e-wallet allows one-click shopping at member sites
  - Entrypoint.com offers a personalized desktop toolbar that includes an e-wallet
- A group of e-wallet vendors have standardized technology with Electronic Commerce Modeling Language (ECML)

Peer-To-Peer Payments

- Peer-to-peer transactions
  - Allow online monetary transfers between consumers
  - eCash allows the transfer of digital cash via e-mail between two people who have accounts at eCash-enabled banks
  - PayPal offers X payments
    - Allows user to send money to anyone with an e-mail address
    - Can be used to enable credit-card payment for auction items in real time (the transaction begins processing immediately after it is initiated), reducing the risk of fraud or overdrawn accounts
  - BillPoint
    - Allows buyers to submit electronic payments to sellers' checking accounts
  - Tradesafe.com (larger transactions, B2B)

Micropayments

- Merchants pay fee for each credit-card transaction
- Micropayments
  - *Payments that generally do not exceed $10, allows companies offering nominally priced products to profit*
- To offer micropayments, some companies form strategic partnerships with utility companies
